

HOW TO Download the Adobe Acrobat Reader

1. Go to the Adobe website: www.adobe.com
2. Click the “Get Adobe Reader” button. It looks like this:
3. You will then see this screen:

If you don't want this option, click the box to unselect it.

4. Hit the big yellow “Download now” button.
5. Downloading starts automatically.
6. If you get a “Save As” message, choose where you want to put Adobe by using the drop-down option.

If an error message appears, click “Cancel,” type c:\ in front of the file name, & click “OK.”

It may take a few minutes to complete the download.

7. Sometimes new programs require rebooting your computer. If you attempt to read documents in Adobe during that same session, but the reader won't work, restart your computer & try again.
